LETTER OF RECOMMENDATION

I feel proud to recommend Ms ~~XXXXXXXXXX~~, who had been of the talented students of this institution. She has shown her sincerity in her work and I feel proud to say that she has pleased every member of this college well not only with her sharp intellect, hard-working and brilliant academics but also with her way of coordinating with the teachers and her peers. I have watched her developing both academically and personally into a mature individual ready in every day for her further education and life, I am quite sure she will get what she aspires in her life if she gets the opportunity. I have been familiar with Kavana during the 3rd semester and 7th semester when I had the pleasure of communicating the key topics of Data Structures with C including Android Application Development to her. I hope my perspective will be useful to appraise the suitability of this commendable candidate, who is seeking a master's program at your famed university.

~~XXXXXXXXXX~~ has excellent analytical and logical skills which she applies resourcefully in problem-solving. I found her to be extremely observant in all my classes where she always came up with challenging queries. Her tremendous managerial and communication skills must find a place in the discussion of her capabilities. She has the ability to voice her ideas clearly.

I must also add that she also displayed appreciable skills in presentations. She also participated in paper presentation competition held in our department on Recent Trends in Computer Science & Information Technology under my guidance. A brilliant student, She was always exceedingly courteous and good-natured. She was always socially composed and cooperative in times of organizing meetings and seminars on behalf of the department. When I delegated to her the charge of coordinating the Industrial visit to Chennai, Tamilnadu in the sixth semester, she surprised me by the intricate details given by her to the arrangements for a group of 50 students and demonstrated her leadership skill too.

Considering her immense potential waiting to be unravelled at your school, I take delight in saying that her performance will be outstanding at your University. I wish her grand success in all her future endeavours. It is my hope that you will give a perusal consideration to her admission application along with scholarships. I shall be readily available to answer any further questions.

Vidya V BE, M.Tech

Assistant Professor, Department of Computer Science & Engineering
