Letter of Recommendation

I am pleased to write this letter of recommendation for [REDACTED], whom I have known for the past 5 years. I have taught him various subjects including Network Analysis, Power Electronics and Linear Integrated circuits. I had also mentored him for his seminar on "Electronic Circuit Breaker using PIC Microcontroller for Industrial machines", which was part of the academic curriculum.

As an Associate Professor in SJBIT, one of the top ranked colleges of Visveswaraya Technological University (VTU), I had the opportunity to teach students and guide many students through their projects and seminars. I have observed that [REDACTED] has consistently stood among the top of all the students I have mentored. He was a good performer in academic tests and exams.

[REDACTED] was liked by the teachers and the students because of his friendly and open minded nature. His interpersonal skills were marked by his friendly and cordial approach towards fellow students and were characterized by a high level of understanding. I have also heard from my colleagues and faculties from other departments about how [REDACTED] was a deserving and capable student of his batch.

His seminar on "Electronic Circuit Breaker using PIC Microcontroller for Industrial machines", during the last semester of the course was the most appreciated seminar and I was pleased to note his impeccable skills of teaching and interaction with the evaluators. He had chosen a subject that needed thorough learning and required researching various papers and documents. [REDACTED] exhibited his extensive research skills in gathering necessary and useful information and proposed his ardor for its practical implementation in near future. The work clearly showed his ability to deliver a clear, concise, and well-thought presentation with a new perspective by demonstrating evolution of technology, merits, comparison with other technologies. I found his ideas to be unique and felt that he would scale greater heights in research.

I must mention that he is passionate about teaching. I can remember that he used to volunteer and teach other students and could deliver explanations coherently and lucidly by streamlining his thoughts in a convenient manner. This coupled with his excellent communication and interpersonal skills make him a deserving candidate for any teacher's assistantship if available.

Knowing [REDACTED] academically and personally, I am confident that he will prove his worthiness and will do well in his academics if given a chance. I would strongly recommend him for the graduate program in your esteemed institution. I would also advise him to pursue a Ph.D., which would qualify him for teaching various students across the globe. Please feel free to contact me for more information if required.
