

LETTER OF RECOMMENDATION

As the lead of Design Domain, Department of Mechanical Engineering, PES University, it is my great pleasure in recommending ~~██████████~~ for the graduate studies in your esteemed University. My acquaintance with him spread over 3 years; I have taught him the subjects 'Design of Machine Elements', 'Mechanical Vibrations' and 'Computing Software for Mechanical Engineers'. He had an outstanding performance in all the above subjects scoring an S-grade, which translates to a 10 on a 10 scale. He has always been a well-disciplined and confident student, showing great willingness to learn. He has exhibited excellent academic performance, securing a 9.22 CGPA and stands 8th in the batch of 170 students.

Apart from his academic excellence, he has undergone summer project under my supervision. I had the chance to personally evaluate him, during which he showcased his ability to think logically and apply the learning analytically. He has extensive knowledge of Matlab and Ansys. Altogether, he was able to come up with a technical problem with the intention of learning research methodology and publishing a technical paper. As a result, he published three international conference papers (two papers at JVE-2018 and one at ISME-2018).

I strongly feel that ~~██████████~~ is a student with an excellent ability for logical and intuitive thinking; he has proved his dexterity to understand a problem and to conceptualize and analyze a situation. Apart from being technically sound, he has shown a thirst for grasping and visualizing practical difficulties that were faced during the summer project. Further, he has the capacity of adapting himself to new and challenging environments. With these strengths and his co-operative nature, I firmly believe he would make a successful candidate for pursuing higher studies in your University.

As a professor, owing to his noticeable personality, I place him among the top 1 % of the students in the department. I am confident that he is a student with great zeal for higher academic pursuits and aptitude for research. I strongly recommend his candidature for your graduate program with full financial assistance. I wish him all the very best in his endeavors. Please do not hesitate to contact me if you require any more information.
